# Precaution

This white paper is intended to provide information about the GOMDORI Project and share the vision of its development.

Our project team does not have intentions to encourage you to invest in us, and this white paper is not intended to encourage investment. The purpose of this white paper is to provide business models, platform uses, and technical details about the GOMDORI Project.

Because this white paper is not intended to encourage investment, nothing listed on this white paper is guaranteed to be accurate or warranted. Moreover, please note that this white paper is written based on the status at the time of its preparation, so it may be modified in the future and may change from time to time depending on market situations and our project team's conditions.

We recommend you to fully understand and analyze the relevant factors and risks before participating in or purchasing GOMDORI (GOMD) Tokens. A. Global market and economic conditions may prevent funding or maintaining of the GOMDORI (GOMD) Token ecosystem in the intended direction due to the risk of changes in the value of GOMDORI (GOMD) Tokens. B. Any faults regarding the storage of GOMDORI (GOMD) Tokens, such as losing the private key associated with the digital wallet storing GOMDORI (GOMD) Tokens, will be considered as the buyer's fault. C. Changes in the social, political, or cryptographic environment and regulations in different countries may impose unfavorable conditions for the GOMDORI (GOMD) Token, and it may cause major changes to the GOMDORI (GOMD) Token Project.

Furthermore, this white paper assigns no objective value, as everything written is based on our project team's subjective opinions. Roadmaps and future plans are just plans as written, so things may change any time during the project period. We do not hold any moral or legal responsibility for consequences resulting from your actions with regard to this white paper.

# Introduction of GOMDORI Project

GOMDORI Project is an innovative all-in-one global commerce solution based on Gomi Corporation's blockchain technology. It plays a crucial role in the ASEAN commerce market. Additionally, developed as a WEB 3.0 AI platform, GOMDORI Project maximizes the decentralized nature of blockchain and the automated functions of smart contracts. By closely integrating blockchain technology with fulfillment, sourcing, distribution, sales, and digital marketing, GOMDORI Project aims to establish a groundbreaking business model.

GOMDORI Project utilizes blockchain technology to efficiently manage and provide a secure transaction environment for fulfillment, sourcing, distribution, sales, and digital marketing. Leveraging the decentralized nature of blockchain and the automated functions of smart contracts on a WEB 3.0 AI platform, it ensures transparency in managing the entire supply chain (SCM) while reducing costs and saving time by eliminating intermediaries.

In the **sourcing phase**, blockchain records transparently and reliably the origin and quality information of products. It establishes trust by connecting with reliable transaction partners, providing end-users with confidence. The distributed ledger of blockchain transparently records the verification and certification process of sourced products, as well as stores information from customs authorities worldwide, offering product reliability to global consumers.

In the **distribution phase**, blockchain enables efficient tracking of product transportation and inventory management. With the use of smart contracts, an automated logistics process is established, allowing real-time monitoring of product location and status. This empowers customers and franchisees to build a swift and efficient logistics system, enhancing product movement and inventory management.

In the **sales phase**, blockchain enhances the trustworthiness and transparency of transactions, providing consumers with a safe purchasing experience. The distributed network structure of blockchain prevents unauthorized changes to transaction data and safeguards brand value from rapid deterioration. Consumers can verify product origin, quality information, and transaction history. This enables consumers to purchase trustworthy products, while sellers can establish a reliable reputation through blockchain.

**GOMDORI Project** combines Gomi Corporation's all-in-one global commerce solution with blockchain technology to revolutionize fulfillment, sourcing, distribution, sales, and digital marketing. By harnessing the decentralized nature, transparency, and security of blockchain, **GOMDORI Project** maximizes the efficiency of the entire supply chain, providing a stable transaction environment. This offers innovative experiences to customers, franchisees, and consumers. The project aims to strengthen its competitiveness in the global commerce market, utilizing the full potential of blockchain to drive global business growth.

The brown bear, **GOMGOMI**, the mascot of the GOMDORI Project, is being utilized in the logo, website, and various contents related to NFT.

GOMGOMI NFT represents unique digital assets that can denote ownership or authenticate digital or physical items. These NFTs have gained popularity in creative and collectible domains.

Through GOMGOMI NFT, exclusive and limited-edition digital collector items can be offered. These NFTs can take various forms such as digital artworks, animated images, or interactive experiences that fans and collectors can own and trade. Leveraging blockchain technology ensures the ownership and trustworthiness of these NFTs.

GOMGOMI NFT can also be used as tokenized memorabilia for activities and events related to the GOMDORI Project. For instance, participants who possess NFTs created to commemorate project milestones or special events can enjoy exclusive benefits or unique experiences.

GOMGOMI NFT provides various benefits to GOMDORI membership users and holders. Users who hold these NFTs can enjoy discounts on Gomi Corporation's commerce mall, Gomi Play OTT subscriptions, K-medical services, and more. Additionally, GOMGOMI membership extends its benefits beyond Korea to ASEAN (SEA) countries, offering perks such as discounts at resorts, hotels, and Grab taxis in Vietnam. Through these offerings, GOMGOMI NFT enhances the experience of membership users by providing them with privileges and special advantages.

# Market Overview

The ASEAN e-commerce market is showing rapid growth. As of 2022, the e-commerce market size is estimated at around 165 trillion won, and it is expected to reach approximately 267 trillion won by 2025. This reflects the significant increase in online shopping demand as digital technology becomes more widespread and internet accessibility improves, coupled with the economic development of the ASEAN region.

The current status of the ASEAN e-commerce market exhibits notable characteristics from various perspectives. Firstly, the ASEAN region is known for its large population and rapid economic growth, indicating a high market size and potential for consumer demand. Additionally, the rise in mobile and internet penetration has led to significant growth in mobile commerce, and the development of social commerce through integration with social media is also noteworthy.

The ASEAN e-commerce market also presents fresh business opportunities. Unlike traditional offline trading methods, online transactions significantly reduce temporal and spatial constraints and provide an environment where products and services can be easily offered to consumers through various channels and platforms. Furthermore, the ASEAN region's diverse countries and coexistence of multiple cultures allow for the entry of a wide range of products and brands, and there is high interest in international trade.

The ASEAN e-commerce market is expected to continue growing in the future. Advancements in digital technology and the emergence of innovative solutions will create a more convenient and secure online trading environment, further stimulating consumer demand for online shopping. Additionally, the economic integration within the ASEAN region and the strengthening of trade agreements support this development.

The GOMDORI Project team fully understands the trends and future growth potential of the ASEAN e-commerce market. We aim to contribute to the growth of the ASEAN e-commerce market by combining blockchain technology with innovative global commerce solutions, providing consumers with convenient and secure online shopping experiences. Furthermore, we aim to go public through an IPO in 2026, continuously enhance our business growth, and strengthen our competitiveness in the global market, becoming a leading company in the ASEAN e-commerce market.

# Introduction of GOMIcorp

## <COMPANY OVERVIEW>

<b>Company Name</b>	GOMI Corporation Co., Ltd.
<b>Location</b>	Seoul, South Korea
<b>Established</b>	February 1st, 2019
<b>Parent Company</b>	Gomi Corporation Co., Ltd
<b>Subsidiaries</b>	Gomi Corporation Vietnam Gomi Corporation Thailand Gomi Corporation India Gomi Play Singapore
<b>Industry</b>	Global commerce and IT solution services
<b>Capital</b>	KRW 81 million
<b>Number of Employees</b>	82

**GOMI Corporation** is an innovative global commerce solution provider that plays a significant role in the ASEAN commerce market. GOMI is responsible for sourcing, distribution, and sales of Korean brands, aiming to meet the demand for Korean products in the ASEAN region and establish a platform for direct consumer access.

GOMI Corporation operates **subsidiary companies in Vietnam, Thailand, India, and Singapore** as part of our global commerce solution business. Through these subsidiaries, GOMI leverage the characteristics of local markets and drive business growth. The ASEAN commerce market is experiencing a rapid increase in demand for various products and services, and to address this, we provide IT data-driven solutions.

By utilizing IT data-based solutions, GOMI Corporation develops innovative solutions in various areas such as logistics, fulfillment, channel distribution, marketing, and customer service. GOMI plan to further develop solutions such as market research and report data provision to support customers in leveraging accurate data and insights for business growth. Additionally, GOMI is pursuing expansion into our own brand and content business areas, aiming for continuous business diversification and growth.

In 2022, GOMI Corporation achieved significant growth with approximately KRW 60.5 billion in revenue. GOMI currently hold around 600 brands and have accumulated 14,000 product SKUs, offering consumers a wide range of choices and high-quality products. Moreover, the ASEAN commerce market is estimated to reach a size of approximately KRW 165 trillion by 2022 and is expected to grow to around KRW 267 trillion by 2025. GOMI is determined to capitalize on the potential of this expanding market and continue to grow and evolve.

GOMI Corporation is committed to ongoing growth and development based on the potential of market expansion. Our future goal is to be listed on the NASDAQ and KOSDAQ exchanges by 2026, securing greater recognition and competitiveness in the global market. Listing on NASDAQ and KOSDAQ is an important milestone that reflects trust and recognition in GOMI Corporation's business performance and technological innovation. This will allow us to demonstrate higher value and growth potential in the global market, strengthening our position as a leading company in the ASEAN commerce market through blockchain and all-in-one global commerce solutions.

GOMI Corporation operates subsidiaries in Vietnam, Thailand, India, and other countries for our global commerce solution business. In Korea, GOMI provide payment solutions as a fintech company and also operate an energy product distribution company. Furthermore, our subsidiaries in Southeast Asia have a platform service that integrates kids' content and commerce. Through these endeavors, GOMI pursue growth and business diversification in various business areas. GOMI Corporation strives to respond promptly to customer demands, provide innovative solutions, and generate consistent results. Customer satisfaction and trust are our top priorities as we enhance our competitiveness in the global market. GOMI remain committed to continuous innovation and development for a better future.

# Service of GOMDORI Project

**GOMDORI Project aims to maximize the efficiency and profitability of global commerce solutions through various services. GOMDORI actively utilize innovative technologies such as blockchain, Web3, and AI, and provide the following services:**

1

The Order and Logistics Integrated Management System utilizes blockchain technology to enable real-time data integration and management between marketplaces, warehouses, and shipping companies. This ensures the security and integrity of transaction data while leveraging the decentralized nature of Web3 to enhance trust in transactions. AI technology analyzes order information to establish efficient logistics processes and optimizes inventory management and demand forecasting through predictive analysis.

The GOMI PARTNER Information Management System securely manages and shares partners' master information using blockchain. It systematically manages partners' export, sales, and inventory status through encryption and distributed networks, strengthening trust relationships among partners through the transparency of Web3. AI technology evaluates partner performance through data analysis and automates the settlement process, increasing operational efficiency.

The GOMI PARTNER Report System visualizes local B2C/B2B sales and logistics data using blockchain and AI. Blockchain ensures the integrity and trustworthiness of data, while AI technology shares real-time sales and logistics information with partners. This enables accurate demand forecasting and inventory management and provides personalized information to users through the personalization features of Web3.

**GOMI MALL** is an online marketplace solution that utilizes blockchain and Web3 technology to create a Korean product marketplace. It ensures transaction transparency and security through blockchain, while offering localized features such as regional currency, language, and policy application through the decentralized nature of Web3. Additionally, AI is used to develop personalized search and recommendation features, providing users with a customized experience.

The **GOMI PARTNER Automated Settlement System** is a solution that utilizes blockchain and smart contracts to automatically settle payment to manufacturers/brand owners. It provides a reliable settlement process through the transparency and immutability of blockchain, playing a vital role in building long-term partnerships with partners.

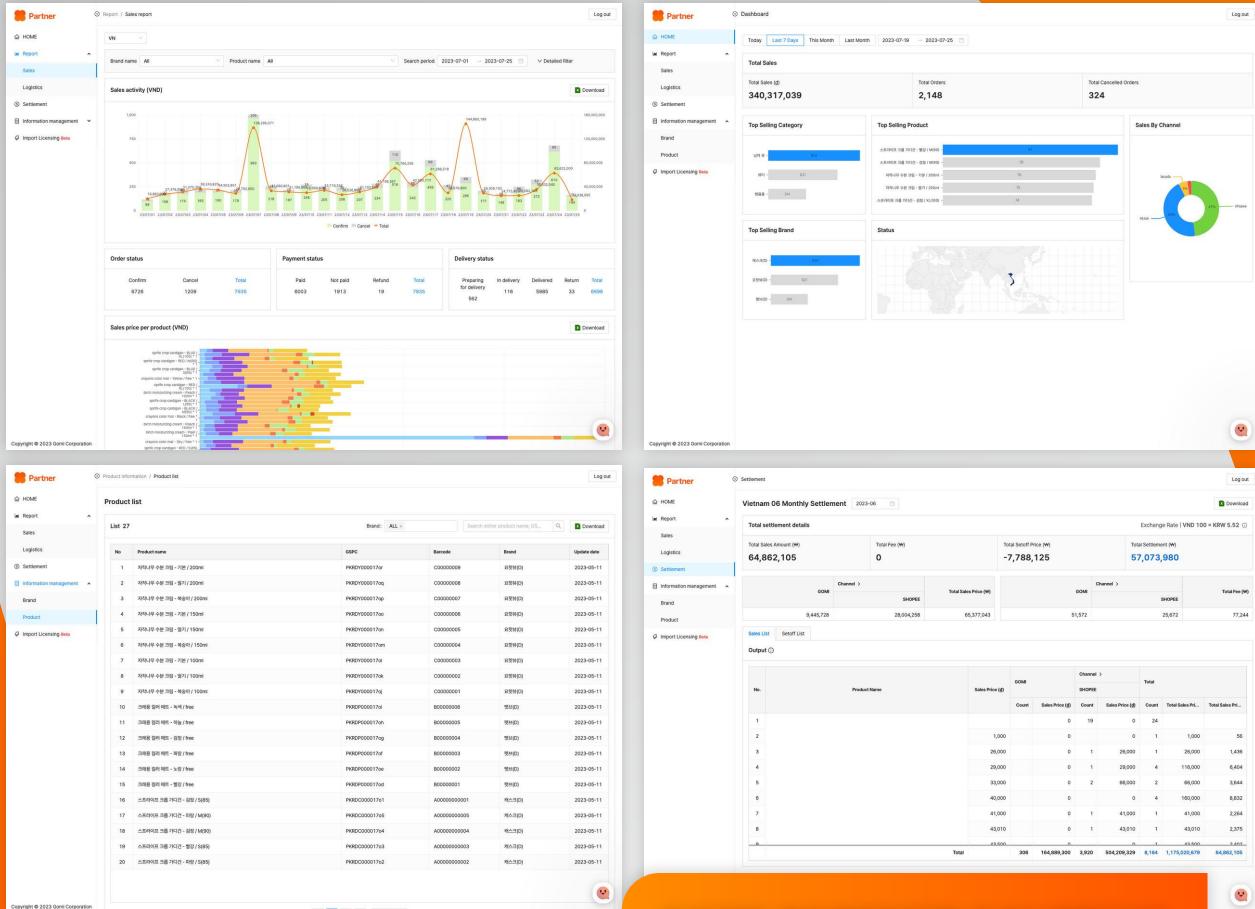

The cultivation of in-house and imported brands is a business strategy planned and developed by the GOMDORI Project. It protects the intellectual property (IP) of brands using blockchain and Web3, and builds a content-based commerce platform. AI is also used to provide data-based insights for product development and marketing, supporting business expansion and improving profitability.

**GOMI PLAY** is a platform and solution that integrates kids' content and commerce consumption, the first of its kind in Southeast Asia. It provides an integrated education and community platform combining content and commerce using the technology of blockchain and Web3, aiming for cultural scalability across regions. AI technology learns user behavior to provide personalized experiences and supports smooth interaction between users and content creators.

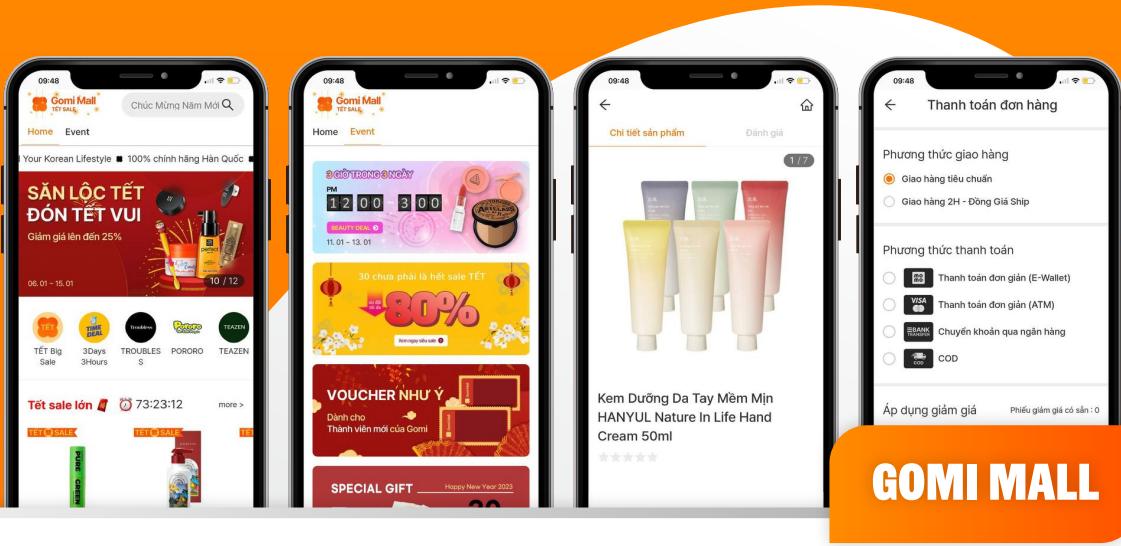

These services leverage the convergence of blockchain, Web3, and AI to provide innovative functionalities and technologies, playing a crucial role in the growth and profitability improvement of the **GOMDORI Project's global commerce solutions**.

# Product of GOMI Project

## GOMI PARTNER SOLUTION

Gomi Corporation's Gomi Partner Solution is an in-house developed platform that combines WMS, OMS, ERP, and other key systems into one interface. It offers a streamlined and comprehensive view of operations, making it a unique and efficient solution for businesses to manage logistics and order processing.

## GOMI MALL

**GOMI** Mall is an innovative online marketplace that provides users with a seamless and secure shopping experience. With AI-powered personalized search and recommendation features, it offers a user-friendly interface that caters to individual preferences and interests. The platform ensures transaction transparency and supports regional customization, making it a preferred choice for consumers seeking diverse products and services.

## GOMI PLAY

**GOMI** PLAY is a kids-focused platform that leverages **GOMI** Corporation's technological expertise and services. Initially launched in Vietnam, it caters to the children's industry, offering a range of innovative and tech-driven solutions. Through **GOMI** PLAY, kids can access educational and entertaining content, while the platform ensures cultural scalability and personalized experiences.

# GOMD - GOMDORI Token

<b>Token Ticker/Network</b>	GOMD/BEP20 (To be determined)
<b>Total Token Supply</b>	10 billion (To be determined)
<b>Tokenomics</b>	Ecosystem 40%
	Strategic Investors 15%
	Development 15%
	Marketing 10%
	Staking 10%
	Liquidity 5%
	Reserve 4%
	Advisors 1% (To be determined)

**Token Usage** The GOMD coin of the GOMDORI Project has various use cases and utility closely related to the ASEAN e-commerce market, the global commerce solutions provided by GOMI Corporation, and other key content. Here is a detailed explanation of the uses and utility of the GOMD coin:

**Product Purchases and Payments:** The GOMD coin can be used within the GOMDORI platform to purchase and make payments for various products available in the ASEAN e-commerce market. Users can conveniently and securely utilize GOMD coins as a means of payment, accessing a wide range of brands and products through the global commerce solutions.

**Commerce Solution Fees:** Brands and merchants utilizing the global commerce solutions provided by the GOMDORI platform can pay their service fees using GOMD coins. This enables businesses operating in the ASEAN e-commerce market to use GOMD coins as an efficient and cost-effective payment method.

**Marketing and Promotion Activities:** GOMD coins can be utilized for marketing and promotional activities. Businesses operating in the ASEAN e-commerce market can participate in advertising, promotions, events, and other marketing activities using GOMD coins to maximize their promotional impact.

**Data Management and Analysis:** The GOMDORI platform utilizes blockchain technology to securely manage and analyze data in the ASEAN e-commerce market. Members holding GOMD coins can access and analyze data, aiding in business decision-making processes.

**Purchase and Utilization of Exclusive Content:** The GOMDORI platform offers various exclusive content from GOMI Corporation. Members can purchase and utilize GOMI Corporation's content using GOMD coins, gaining access to content provided within the platform.

**Payment Solutions Integration:** As a fintech company providing payment solutions, the GOMDORI platform offers secure and fast payment services through GOMD coins. Members can utilize GOMD coins to process various financial transactions and use them as a means of payment, strengthening collaborations with fintech companies and providing more efficient financial services.

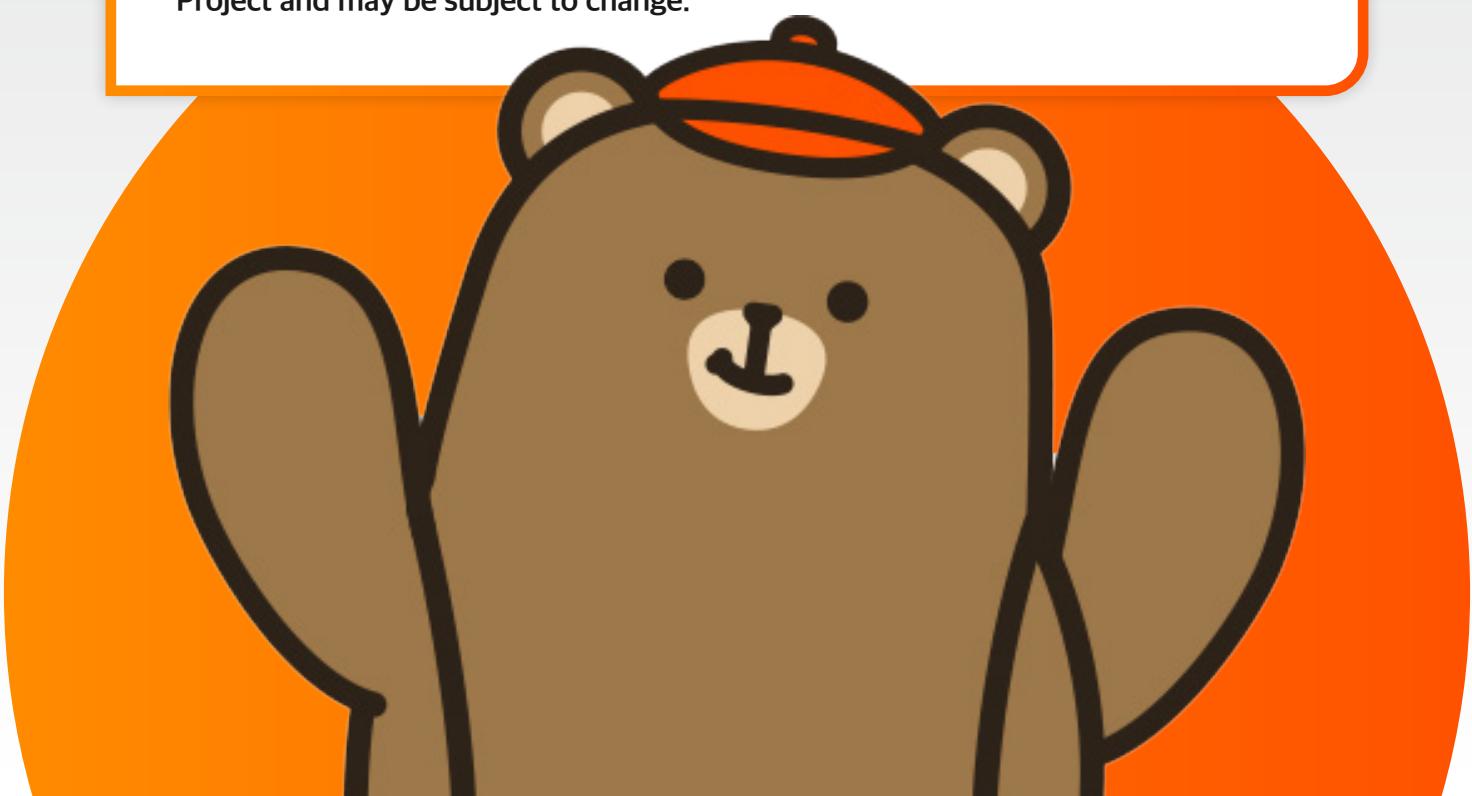

**Collaboration with Energy Product Distribution Companies:** The GOMDORI platform facilitates the purchase and sale of various energy products through collaborations with energy product distribution companies. Members can use GOMD coins to purchase and sell energy products, ensuring stable and efficient distribution through collaborations with energy product distribution companies.

**Financial Services and Rewards Programs:** The GOMDORI platform can provide members with various financial services. Members can utilize GOMD coins to access financial services such as deposits, loans, investments, and participate in rewards programs. This enables members to benefit from collaborations with fintech companies, receiving various financial services and rewards.

**Staking Services:** The GOMDORI Project offers staking services, allowing users to store, transfer, and utilize GOMD tokens for services such as depositing collateral. Users can actively contribute to the protocol, efficiently manage their assets, and support the overall security and growth of the network.

By providing these functionalities, the GOMD coin of the GOMDORI Project is closely connected to the ASEAN e-commerce market, global commerce solutions, and the core content of GOMI Corporation. Members can experience various use cases and utility by utilizing GOMD coins, enhancing convenience and efficiency in their business activities and content utilization in the ASEAN e-commerce market.

Please note that the specific details and implementation of the GOMD coin's uses and utility are subject to the final design and implementation of the GOMDORI Project and may be subject to change.

# Roadmap

## SECOND HALF OF 2023:

- Signed a contract with VTC Online, a subsidiary of the Vietnamese Ministry of Information and Communications, for the sale of children's content and products.
- Expand and enhance customer services through the use of blockchain-based solutions.
- Achieve product exports worth \$1 million to China and Taiwan.
- Signed an export contract with a Korean pharmaceutical company.

## FIRST HALF OF 2024:

- Series C funding round: Raise \$25 million with a company valuation of \$150 million.
- Strengthen product certification and transaction transparency using blockchain technology.
- Establish a local subsidiary in Las Vegas, United States.

## SECOND HALF OF 2024:

- Selected as an innovative growth startup in Toronto, Canada, establishing a local subsidiary and attracting separate investments.
- Enhance transaction efficiency through blockchain and expand business networks.
- Achieve export records of over \$3 million between Canada and Korea.

## FIRST HALF OF 2025:

- Enter the Korean beauty brand market in major beauty stores in the United States, achieving sales of over \$10 million.
- Establish a rapid delivery system and efficient logistics management using blockchain.
- Establish a 2-hour delivery system within US cities.

## **SECOND HALF OF 2025:**

- Develop products and content utilizing the GOMDORI character.
- Protect and manage content copyrights and distribution using blockchain.
- Produce and distribute GOMDORI character cartoons.

## **FIRST HALF OF 2026:**

- Launch a semi-premium fashion brand featuring the GOMDORI character.
- Provide discounts and benefits in pet cafes, pet taxis, animal hospitals, etc., through NFT membership cards utilizing the GOMDORI character.
- Apply and utilize Web 3.0 technology to enhance user experience and functionality on the GOMDORI platform.

## **SECOND HALF OF 2026:**

- Launch flagship stores for selling various products such as fashion, beauty, and accessories (Ho Chi Minh and Hanoi in Vietnam, Bangkok in Thailand, Singapore, Kuala Lumpur in Malaysia, and Hannam-dong in Seoul, South Korea), and operate NFT membership lounges.
- Apply blockchain technology to manage sourcing, distribution, and sales processes on the GOMDORI platform, enhancing transaction transparency and security.
- Establish a customized recommendation system by analyzing user preferences and tastes based on AI on the GOMDORI platform.

## **2027:**

- Transition to an environmentally friendly consumer goods company by providing eco-friendly products using recycled PET bottles.
- Implement rescue projects for endangered species like polar bears and pandas, aiming to reduce carbon emissions and petroleum dependence.
- Enhance customer service through AI technology for quick and accurate customer response and problem-solving on the GOMDORI platform.

**Please note that the roadmap is subject to changes over time and may be updated based on the progress of the project.**

# Legal Disclaimer

Please read this white paper carefully and understand its contents completely.

If you have any questions about the actions you should take, GOMDORI Team recommend that you seek advice from your legal, financial, and other relevant experts. The GOMDORI Team will not be liable for any actions you take by confirming the information contained in this document. Also note that this white paper has been written based on the status at the time of its preparation and may be modified or changed in the future. Even as it stands, this white paper does not assign objective value.

The GOMDORI Team does not encourage you to invest, and this white paper is not intended to encourage you to invest. This white paper was written for reference purposes to provide information on the GOMDORI Project.

## (I) Prohibition of the Presumption of Investment Recommendation

This white paper should not be construed as an investment recommendation in any way, and you shall fulfill your own duty of care. The consequences of your decisions, actions, and behaviors are based entirely on your judgment, whether it is profit or loss. In other words, it is important to note that the GOMDORI Team will not be liable for any losses, liabilities, or other damages to you and will not assume any legal responsibility.

## (II) Prohibition of the Presumption of Advice

Nothing written in this white paper constitutes advice. GOMDORI Team recommend that you read this white paper carefully and independently consult a relevant expert if you have any questions.

## (III) Restricted Regions Warning

This white paper is not intended for distribution, use, etc. to persons in countries or regions where distribution, publication, or use is in violation of laws or regulations. In certain countries and regions, distribution and subscription of this white paper may be restricted or prohibited by law or regulation, so please check and be aware of the limitations on your own. In other words, it is important to note that the GOMDORI Team will not assume legal responsibility for access to this white paper from areas where access is prohibited or considered illegal, and that individuals are liable for such incidents and their consequences.

## (IV) Predictive Statements Warning

Certain expressions in this white paper contain various predictive statements about the future, vision, and plans of the project. These statements will be expressed in various terms regarding the future such as "purpose," "objective," "goal," "predict," "target," "trust," "possible," "possibility," "planning," "potential," "will be," and "will do." However, these predictive statements and terms are not statements based on historical facts and contain a variety of risks and uncertainties. Therefore, the expected activities, guidelines, and targeted projects in this white paper may not be achieved or be changed in unpredictable circumstances, and this white paper does not assign them any objective value. This is a clear statement that there is absolutely no assurance or guarantee of any situation arising in relation to predictive statements.

#### (V) Prohibition of Illegal Currency Trading

The GOMDORI Team ensures that it never engages in illegal currency trading and other illegal activities under any circumstances, and the purchaser and participant must also agree not to participate in any such illegal transactions or activities (money laundering, illegal currency trading, etc.). If these guidelines for actions and behaviors are abused or not fulfilled, the GOMDORI Team will not be held liable.

#### (VI) Advertisement and Distribution

This white paper is intended to provide information, and is not for advertising and distribution. Accordingly, this white paper shall not be spread, distributed, or reproduced for any purpose.

#### (VII) Loss of Private Key for Wallet

The GOMDORI Team clearly states that it is not responsible for any loss of private keys for wallets nor for any disadvantages or damages caused by the loss of private keys.

The contents included in this white paper is merely an indicator. The white paper is not a plan for securities issuance, nor is it intended to induce investment or to encourage the issuance, purchase, or investment of securities. Therefore, it should not be read in any form in the direction of investment advice or recommendation. Furthermore, participants must be aware that the GOMD Token is not for the issuance of securities. Participants should refrain from participating for the above purposes.

The GOMDORI Team shall not be held responsible in any way for any losses, liabilities, or other financial damages caused by investors or participants making decisions by referring to this white paper, nor shall it assure or guarantee any future profits or losses from transactions of coins or tokens related to this white paper.

This white paper does not assign objective value. Please keep in mind as you read this white paper that it is just a subjective opinion of the GOMDORI Team. Also, please note that any plans including the roadmap are predictive statements and not definitive statements. In addition, there may be changes in various market conditions such as political, societal, and economic changes, and there is a possibility that the project coin/token will not be accepted or applied, and the project team's plans and objectives may not be executed or achieved despite the efforts of the GOMDORI Team.
